

Heartland

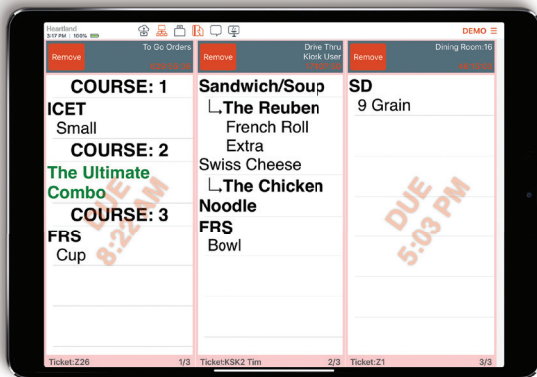

Restaurant Kitchen Display System

Increase your kitchen's efficiency and productivity.

With Heartland Restaurant, orders are automatically sent to iPads in the kitchen from your servers, minimizing confusion. When changes occur, Heartland Restaurant immediately updates and inserts changes into the order, increasing the speed of service. Choose from a variety of settings to fit your needs. Select one or two rows or scale to fit viewing, change the font size, recall deleted orders, and more. When communication and speed of service are paramount, Heartland Restaurant can make your kitchen more efficient.

Key Merchant Benefits

- Quick configuration view allows you to see 2 rows, change font sizes and more
- Color-formatted time alerts
- Order shown split up by course and/or seat
- Swipe to recall and restore orders
- Real-time view of all orders coming from table, counter, bar, kiosk and online
- Text notification to guests when order is ready
- All day summary provides quick visibility of your total prep needs on the line
